PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8717

SESSION NUMBER: 1

DATE OF SESSION: 09 DEC 87

DATE OF REPORT: 10 DEC 87

START: 1023

END: 1127

METHODOLOGY: SOLO

VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: See attached tasking data.
2. (S/NF/SK) VIEWER TASKING: 018 was briefed just prior to session, and was provided with the individual tasking sheet (attached).
3. (S/NF/SK) COMMENTS: Much more self-discipline and/or practice will be required to succeed in this mode of operation (i.e. Solo); this is particularly true in 018's case.

 CPT, USA

CLASSIFIED BY: DIA-DT  
DECLASSIFY : OADR

Solo Flight / Free Flight

COORDINATES: 589281/856562

REQUIREMENT: Access the Target Site at 589281/856562 and identify/describe the new structure(s) of high intelligence interest. Address and respond to the following EEI:

- a. Provide an overview of the Target Site and identify the structure(s) of specific intelligence interest.
- b. Describe the purpose and actual or intended use of the new/recent construction activities at the Target Site.
- c. Provide conceptual drawings in support of your findings.

GOVERNMENT  
memorandum

DATE: 9 December, 1987

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J

TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018  
 Session date: 9 DEC 87  
 Mode of operation: Solo

2. (S-SS) The perceptions gained in this session were:

*July 1987*  
 a. There were no perceptions whatever about the general location (in the world) of the target site.

*July 1987*  
 b. The general area surrounding the target appears to be flat land which has some unevenness to it, when taken as a very large area.

*July 1987*  
 c. The immediate area around the target contains several very large buildings (see drawing, bottom P. 5), most of which had peaked roofs. These are widely spaced from each other, with large expanses of open space between which is very flat. There were repeated impressions of this entire space being paved or otherwise denuded of vegetation. Between the target structure and a nearby very large structure, there are lines on the ground. I could not tell whether these were roads or RR lines. *(See Exhibit)*

*July 1987*  
 d. Looking for new construction (given in the tasking), I found myself standing on a tall, squarish structure with a flat roof. At the bottom was a broad, white flat area, a portion of which led off at one corner (see drawing, bottom P. 4). I was unable to find out whether the structure I was standing on was the new construction, or whether there was new construction TO it. I had the feeling that something on the flat roof of the structure was important, but every time I tried to get perceptions of it, I could not.

*July 1987*  
 e. Inside the area of "new construction" there was a perception of metallic noises, large round, blunt-ended "things, and cylinders (see drawings, pages 8 and 10).

f. The site's purposes seemed to be mostly for assembly (not manufacture), a little for study, and very little for training.

*undecipherable  
go on reading*  
 3. (S-SS) Viewer's critique: There was the constant feel that I was in a "hit and run" procedure: I would "land on" target, get some impressions, then lose it almost immediately. I spent the entire session reacquiring the target rather than staying on it.

INTON IN SURVEY: A few around site  
 15 feet, irregular land w/ structures.  
~~THESE ARE~~ Those structures appear  
 low, in color, w/ broken colored  
 roofs. Today no trace of HAD economy  
 pointed roofs.

The Target structure seems  
 to be structurally different: it is  
 tall, square, seems to have a  
 flat roof, w/ possibly steps on top  
 of it. Below, at its base, it  
 seems to be situated on a white  
 color "patch" amid the irregular  
 surrounding ground. There seems to  
 be steps off this square "patch" at  
 an angle.

INTERVIEW SUMMARY: SITE OF NEW CONSTRUCTION APPROXIMATELY TO BE A STRUCTURE TO COVER & PROTECT THE ACTIVITY INSIDE. "THIN" INSIDE SOME AUTO LOADS. ~~AT LEAST~~ AT LEAST ONE IS LOW & ROUND w/ BLUNT ENDS. IT SEEMS TO BE HOLLOW, BUT MAY NOT BE A SILENT VEHICLE. ROUND "THIN" AS WELL. ACTIVITY IS NOISY w/ lots of METALLIC SOUNDS. POSSIBLY OF SITE SOUNDS TO BE FORM ASSOCIATE OF ?, BUT MORE PROB DO NOT FORM STUDY + TRAINING
